#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 17 July 2008.
- 2a) This action is **FINAL**.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

**DETAILED ACTION**

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit **2614**.
2. This communication is responsive to the applicant's response/amendment filed on 7/17/2008.
3. Claim 1 has been amended on 7/17/2008.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. **Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuda et al., U.S. Patent No. 7,394,913, filed on 8/31/2004, (hereby Matsuda).**

6. As to claim 1, Matsuda teaches a loudspeaker (Fig. 2, element 10) comprising a frame (1), a magnetic circuit (5, 6, 7) held by the frame, a voice coil body (3) disposed

so as it can move freely in a magnetic gap (g) of the magnetic circuit, a diaphragm (8), and a suspension holder (2) whose outer circumferential end is connected to the frame via a second edge; and a supporting section (11) attached to the voice coil body (3), wherein: a diameter of an inner circumference of the suspension holder (2) is greater than an outer diameter of the voice coil body (3) while a diameter of an inner circumference of the diaphragm (8) is greater than the diameter of the inner circumference of the suspension holder (2), the suspension holder (2) has an inner circumferential portion which is disposed on a top surface of the supporting section (11) and is coupled via an adhesive (A) to the voice coil body, and the diaphragm (8) is supported by the suspension holder (2). The edge of the suspension holder (2) is clearly shown attached to the frame, however, it is noted that Matsuda is silent as to how the outer circumferential end is connected to the frame, since the speaker of Matsuda is concerned with the connection of the suspension holder to the voice coil body.

Examiner takes official notice that it is well known in the art to connect a diaphragm of a speaker via an edge to a frame. Therefore it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to connect the outer circumferential end of the diaphragm to the frame via a first edge.

### ***Conclusion***

The prior art made of record

- a. US Patent Number 7394913

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan C. Robinson whose telephone number is (571) 270-3956. The examiner can normally be reached on Monday through Friday from 9 am to 5 pm.
